Ex: 11 Routing at network layer
20/8/2026

Aim:

To simulate and configure static routing Protocol using Cisco packet tracer and observe packet routing b/w networks.

Procedure:

1. Open Cisco packet tracer, Place three router, two Switches and four PCs.
2. Connect devices using ethernet cables
3. Configure IP address of router interface & PCs
4. Enable the router Interfaces using no shutdown command.
5. Configure static router on routers using IP router commands.
6. Configure static router and test up router
7. Verify the routing tables using and testing. Connectivity.

Result:

Thus, static routing was successfully simulated and configured using Cisco Packet tracer, and Packet transfers & back routing was verified.
