b)

Aim:

To Simulate RIP (Routing Information Protocol) using Cisco packet tracer and observe packet dynamic routing b/w different networks.

Procedure:

1. Open Cisco packet tracer.
2. Place three router and two PC's
3. Connect three routers in a triangular.
4. Connect PC0 to router 0 and topology PC to router 2.
5. Configure the IP address for all router interfaces and PC Enable the
6. Verify the routing table Test connectivity using.

Result:

Thus RIP was successfully Stimulated using Cisco Packet Tracer and dynamic router selection and automatic routing were verified.
