3/7/26

Exp: 3b1 HUB

Aim:

To study the behavior of a hub by observing how it forwards data packet using Cisco packet tracer

Steps:

Open Cisco Packet tracer

Drag and place 1 hub and 4 generic PCs into the workspace.

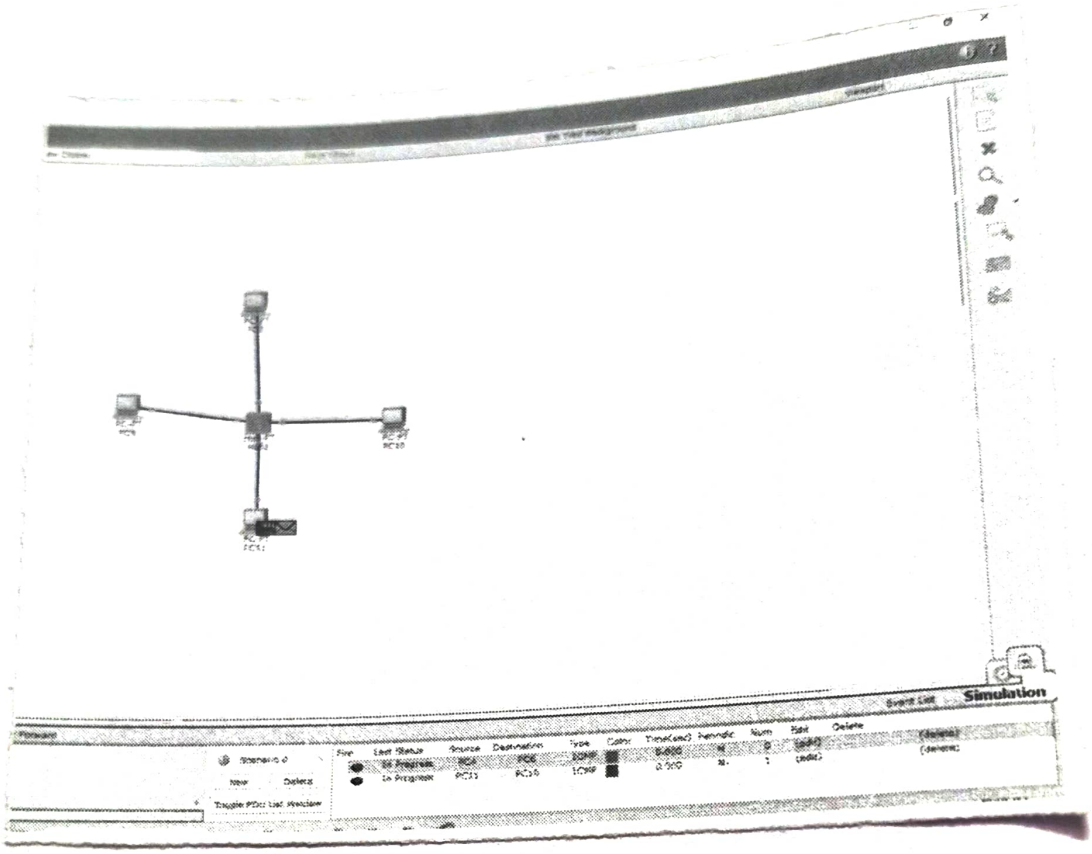

Connect all PCs to the hub using copper straight-through cables.

Configure IP addresses for all PCs in the same network

Select Add Simple PDU from the common tool bar.

Send a packet from one PC (source) to another PC (destination)

Switch to simulation mode and observe how the hub forward the packets.

Simulation

Result:

The hub broadcast the received packet to all connected devices. Every PC receives the packet but only the destination PC accepts it while the other discard it.
