23/7
26 Exp : 362 SWITCH

Aim:
To study the behavior of a switch by observing how it forwards data packet using Cisco packet tracer

Steps:
Open Cisco Packet Tracer.
Drag and place 1 switch and 4 generic pcs into the workspace.
Connect all pcs to the switch using copper straight-through cables.
Configure IP addresses for all pcs in the same network
Select Add simple PDU from the common tool bar
Select Add Simple PDU from the common tool bar
Send a packet from one PC to another PC
Switch to simulation mode and observe how the switch forward the packet.

Simulation

Result:

The switch forward the packet only to the destination PC by using its MAC address table. This reduces incess network traffic and improves communication efficiency.
